BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 44 pages. Dimensions: 9.7in. x 7.4in. x 0.1in.The U. S. Postal Services (USPS) financial outlook has deteriorated as customers have shifted to electronic alternatives. Mail volumes have declined over 20 percent since fiscal year 2006 and are expected to continue declining. To help its financial outlook, in March 2010, USPS presented a detailed proposal to the Postal Regulatory Commission (PRC) to move from a 6-day to a 5-day delivery schedule. USPS projected this would save about 3 billion annually and reduce mail volume by less than l percent. This proposal factors in widespread changes to USPSs workforce and networks. USPS has also asked Congress to not include language in its annual appropriation requiring 6 day-a-week delivery. As requested, GAO assessed (1) USPSs cost and volume estimates and the operational impacts associated with its 5-day delivery proposal and (2) the trade-offs and other implications associated with this proposal. GAO reviewed USPSs proposal (including its assumptions, methodologies, and conclusions) and other information from the PRCs 5-day delivery proceeding, surveyed postal employee and mailer groups, and interviewed USPS officials and postal employee groups. Because GAO previously recommended that Congress consider providing financial relief to USPS, as well as other cost-saving options, this report contains no new recommendations. USPS generally agreed with GAOs findings and provided additional context on its proposed change to end Saturday delivery. This item ships from La Vergne,TN. Paperback.
