Excerpt: . for while the sufferer is undergoing the preliminary treatment above described, which must not be abated until his arrival. Things in the Eye. Sand, broken eye-lashes, cinders, etc., often lodge under the eye-lids, usually the lower lid. When a person complains ot some substance in the eye, the inside of the lower eyelid and lower portion of the ball should first be examined. Pull the lid down and at the same time direct the person to look up and from one side to the other. If nothing be discerned there, the patient is then to be directed to look downward. This will expose to view the upper part of the globe. If the object is under the lower lid, pull the lid down and remove by wiping the little nuisance into the corner of the eye with a camel s hair brush, or a soft rag, or the end of the finger covered with a silk handkerchief. If the object is under the upper lid, lay a pencil or crochet needle or some round smooth thing, as a bodkin, which will turn the lid wrong side out, and remove in the same way. Sometimes a small chipping of iron gets fixed on the ball of the eye, and engineers are often very expert in removing them with the point of a pen-knife. But if you can get a good magnet, it will draw away the chip of iron without any risk of injuring...
