C M OMPARING ETHODOLOGIES 2 D F M ESCRIPTION OF THE OUR ETHODOLOGIES Each methodology has the same goal: Quantify the air quality (emissions) impacts of redeveloping brownfields and developing other infill properties. However, each methodology differs in assumptions, complexity, and relative ease of application. 2. 1 Starting assumptions for all methodologies All methodologies test the proposition that developing an infill location will result in less growth of auto emissions relative to not developing the infill location and instead locating the growth elsewhere in the region. Specifically, the proposition argues the following: 1. The metropolitan region will continue to grow. 2. Growth is projected to locate mainly at the metropolitan regions edge. 3. This growth pattern is largely responsible for producing the regions current transportation patterns. 4. The infill site is an opportunity to shift some of this growth toward the center of the metropolitan area, increasing regional convenience and accessibility, and reducing future growth in...
